APPLIQUE**  
P/N08P48-STK-200

Application  
**2009 RDX**

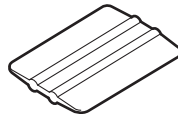

Publications No.  
**BII 39540**  
Issue Date  
**MAY 2008**

## PARTS LIST

Rear bumper applique

Applicator

## TOOLS AND SUPPLIES REQUIRED

Isopropyl alcohol  
Shop towel

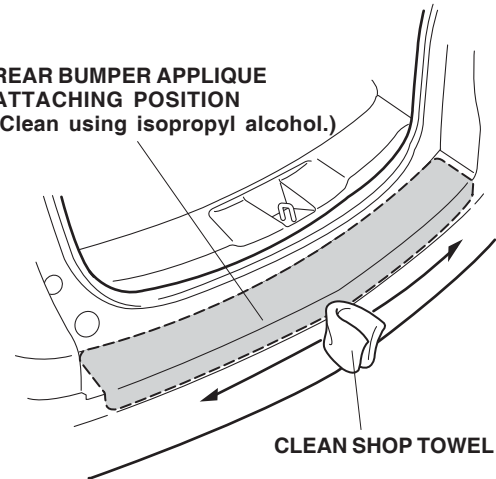

## INSTALLATION

### NOTE:

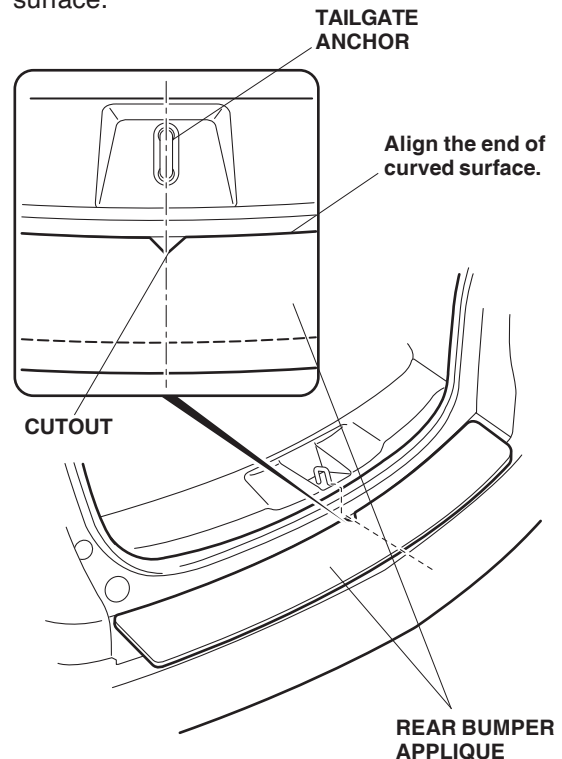

- Be careful not to damage the rear bumper and other finished surfaces of the body.
- This rear bumper applique should be installed only if the ambient air temperature is 60°F (15°C) or above.
- To allow the adhesive to cure, do not wash the car for 24 hours.

1. Using isopropyl alcohol on a clean shop towel, clean the rear bumper where the rear bumper applique will be applied.

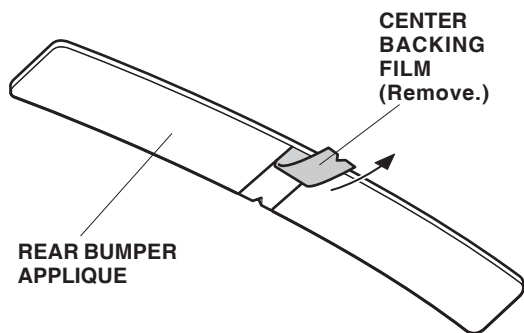

**REAR BUMPER APPLIQUE  
ATTACHING POSITION**  
(Clean using isopropyl alcohol.)

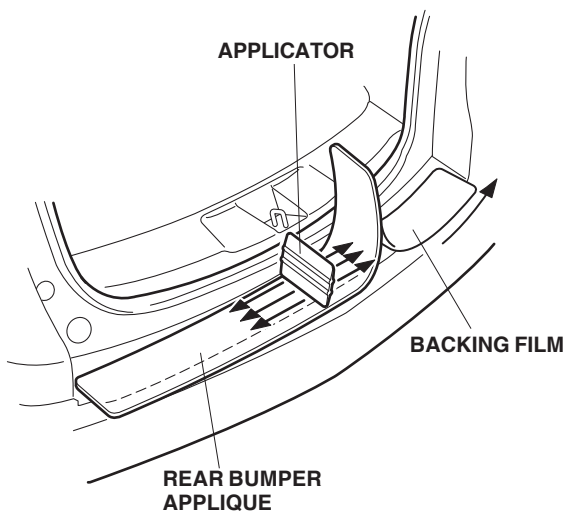

2. Align the cutout of the rear bumper applique with the center of the tailgate anchor. Attach the rear bumper applique by aligning the end of curved surface.

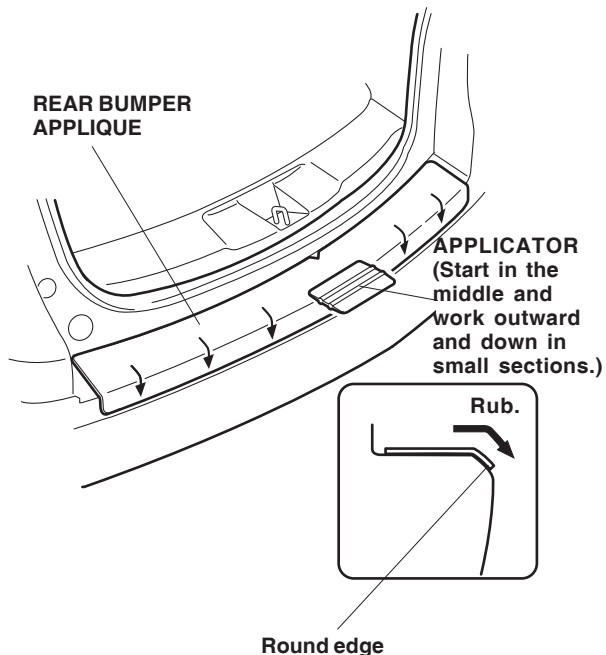

- Remove only the center backing film from the rear bumper applique.

- Starting from the center, remove about 3 inches of backing film and fold it back. Using the applicator, firmly press the top section of the bumper applique against the bumper. Don't worry about the rear round edge at this time. If you see a bubble, stop, gently peel up that section and work out the bubble. Continue across the bumper 3 inches at a time until finished, work slowly keeping pressure against the rear bumper applique. Apply the other side of the applique using the same method.

- Once the top section is finished with no bubbles, use applicator to adhere the round edge. Start in the middle and work outward and down ward in small sections. Rub applicator across and down around the bumper 3 to 4 times to prevent air bubbles. Adhere the rear bumper applique to the other side the same way.

- Remove the protective film from the rear bumper applique after it is thoroughly dry.

Remove the protective film slowly so the rear bumper applique and the protective film are parallel to each other.
