- Torque wrench

*The following tools are available through the Acura Tool and Equipment Program. On the iN, click on: Service > Service Bay > Tool and Equipment Program, then enter the number under “Search.” Or, call 888-424-6857.*

- Trim Tool Set (T/N SOJATP2014)
- Plastic Trim Tool (T/N SILTRIMTL10)

---

### Client Information

The information in this installation instruction is intended for use only by skilled technicians who have the proper tools, equipment, and training to correctly and safely add equipment to your vehicle. These procedures should not be attempted by “do-it-yourselfers.”

### NOTE:

- Be extremely careful not to damage the roof and other finished surfaces of the body when installing the roof rails.
- The weight of the cargo must not exceed the maximum weight capacity of 165 lbs (75 kg).
Installing the Roof Rails

1. Remove the left roof molding starting from the rear of the roof, and work your way to the front.

2. Remove the six clips from each stud bolt on the roof.

3. Install the left roof rail to the roof with six TORX nuts. Torque them to 9 lb-ft (12 N-m). NOTE: Make sure the left roof rail is underneath the front glass molding.
4. Install each cap to the left roof rail with the two retaining tabs.

5. Repeat steps 1 through 4 on the right side of the vehicle.
USE AND CARE
Check the roof rail mounting bolts frequently, and retighten if necessary.
